

It is the responsibility of the person installing the electrical equipment to ensure that the installation meets the requirements of the IET wiring regulations and is therefore 'fit for purpose'. Factors such as correct selection of components, cable sizing, protective devices and Earth bonding are all critical and should be checked prior to full testing and power-up. Any other regulations applicable to the equipment being installed such as the Machinery Directive and current health and safety legislation must also be adhered to.

All connections (including factory made) must be checked for the correct tightness prior to commissioning of the electrical installation. All connections should be inspected periodically to ensure correct tightness.

IP67 125A Weather Proof In-Line Industrial Socket | 125A 415V 3P + E

ISW1254N

Description

- **Conforms to European/ International Standards EN/IEC 60309-2.**
- **IP67 rated weatherproof industrial surface socket.**
- **Spring-return lid with twist-lock ring.**
- **Operating temperature between -25 °C to +40 °C.**
