ULISSE | Keybox Distribution Boards

10kA, C Curve MCBs
16A, 32A, 63A, 100A

30mA RCDs
25A, 40A, 63A, 100A

100A Mainswitch
2 POLE + 4 POLE

Sockets

Straight and angled flush mounting Argo sockets
Key lock interlocked sockets (fuse and non-fused options)

ULISSE distribution boards are ideal for use in a variety of demanding environments and applications including agriculture, construction sites, shipyards and laboratories.

The boards are UV resistant, self-extinguishing and their re-enforced sides guarantee maximum protection against impact.

ULISSE are robust distribution boards providing longevity and protection, safeguarding all component parts.

For ease of installation the boards are equipped with press-in, self sealing cable inlet holes.

HANDLE
Grip/handle for transport

DIN BAR
Up to 17 modules

USE
For portable and fixed mounting

PROTECTION LEVEL
Available with protection class IP44 and IP65

PROTECTIVE EDGE
Protects the sockets from strikes

CABLE INPUT
Press-in cables inlet holes

SOCKETS
Available in 230V and 400V

RESISTANCE
IK07 rated outer casing for high impact resistance

Example configuration

POLIFEMO | Site Distribution Boards

10kA, C Curve MCBs
16A, 32A, 63A, 100A

30mA RCDs
25A, 40A, 63A, 100A

100A Mainswitch
2 POLE + 4 POLE

Sockets
Choice of 32A | 63A fixed plug

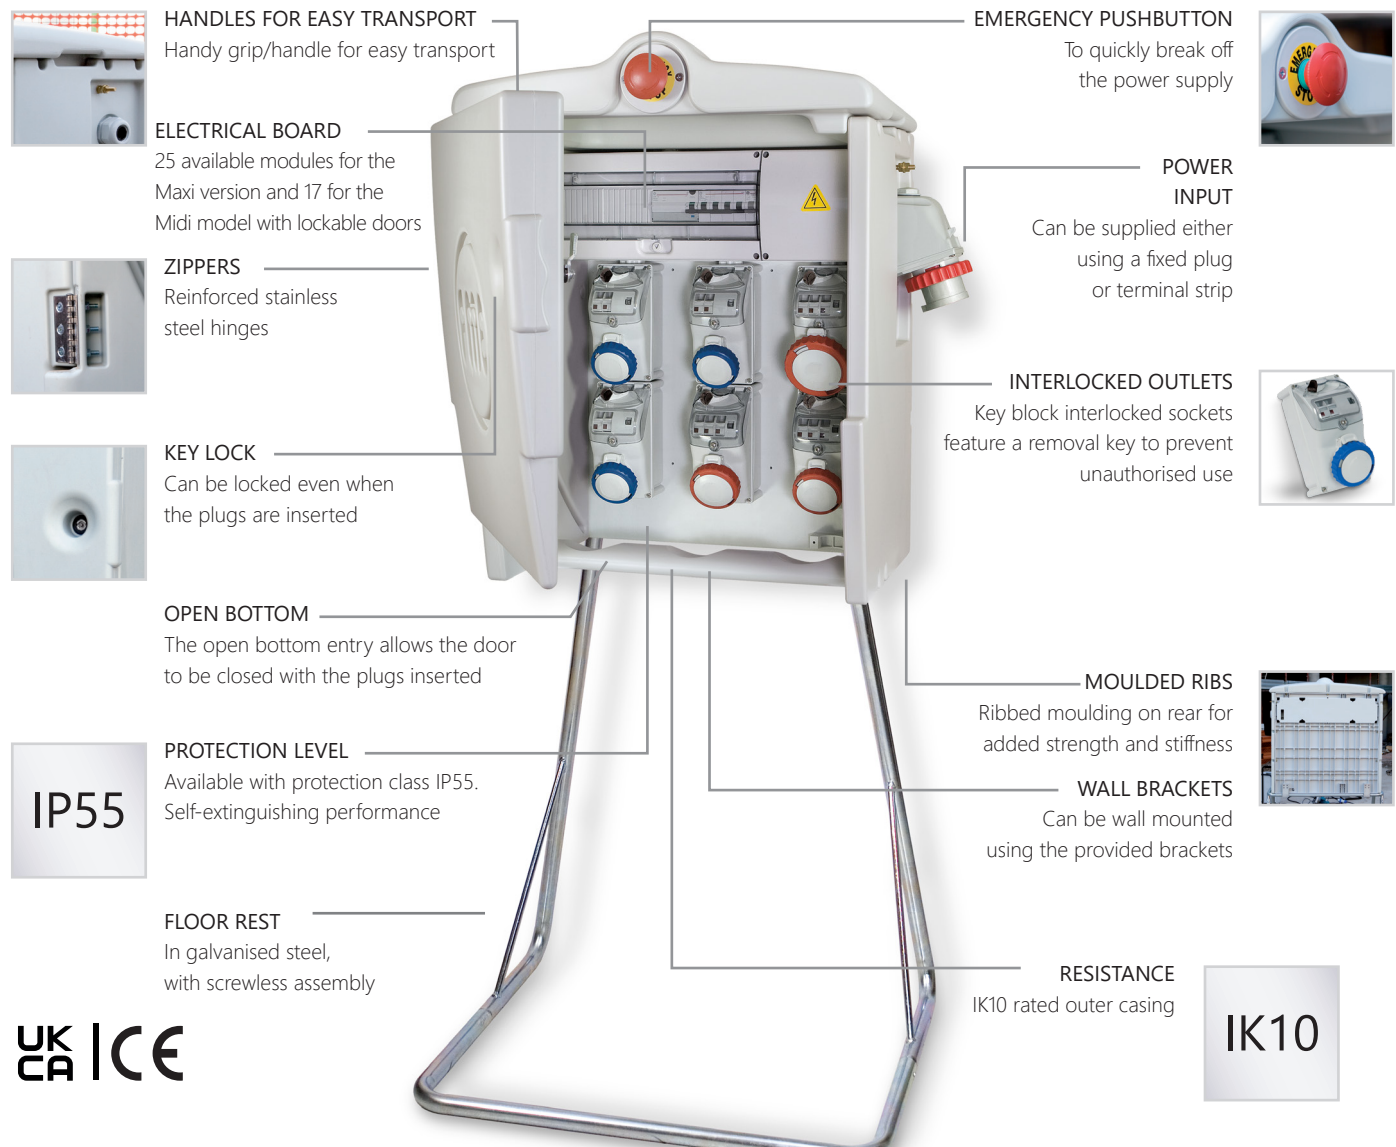

Interlocked Sockets
16A | 32A | 63A | 240V | 415V
2P + E | 3P + E | 3P + N + E

Polifemo distribution boards provide top level performance for a wide range of applications. The robust, user friendly design and choice of durable materials assure compliance to the highest safety standards.

Available in two versions, Maxi and Midi, Polifemo can be supplied in any configuration to suite unique, bespoke requirements.
