

This document must be retained for future reference.

It is the responsibility of the person installing the electrical equipment to ensure that the installation meets the requirements of the IET wiring regulations and is therefore 'fit for purpose'. Factors such as correct selection of components, cable sizing, protective devices and Earth bonding are all critical and should be checked prior to full testing and power-up. Any other regulations applicable to the equipment being installed such as the Machinery Directive and current health and safety legislation must also be adhered to.

All connections (including factory made) must be checked for the correct tightness prior to commissioning of the electrical installation. All connections should also be inspected periodically to ensure correct tightness.

DO NOT USE POWER TOOLS ON THESE PRODUCTS

230V Switched Interlocked Socket in Keylock enclosure
RCBO Protected

Features & Benefits

- IP65 (accepts IP67 plugs)
- Complete with pre-fitted 30mA 2P Type A RCBO
- Loop in Loop out terminals except in single module versions
- Self-extinguishing – manufactured in fire & shock resistant material
- Includes spirit level to make installation easier
- Four cable inlets M25 / M32 top, bottom and side entry
- Where fitted meters are MID approved
