

This document must be retained for future reference.

It is the responsibility of the person installing the electrical equipment to ensure that the installation meets the requirements of the IET wiring regulations and is therefore 'fit for purpose'. Factors such as correct selection of components, cable sizing, protective devices and Earth bonding are all critical and should be checked prior to full testing and power-up. Any other regulations applicable to the equipment being installed such as the Machinery Directive and current health and safety legislation must also be adhered to.

All connections (including factory made) must be checked for the correct tightness prior to commissioning of the electrical installation.
All connections should also be inspected periodically to ensure correct tightness.

Change Over Switches

63A and 125A 4 Pole Change Over Switch

- ✓ IP65 Rated
- ✓ IEC / EN 60947-3
- ✓ Polycarbonate Enclosure

Padlockable in the OFF position.
Door interlock defeat mechanism.

Data		Range	Units	LBC634PBB	LBC1254PBB
Rated Operational Voltage Ue					
IEC & EN		Volts	V	690	690
Main Switch: Isolating Voltage up to		Volts	V	750	750
Rated Impulse Withstand Voltage Uimp		Volts	kV	6	6
Rated Uninterrupted Current Iu		Amps	A	63	125
Rated Operational Current Ie

Door Interlock Defeat Mechanism (For Authorised Personnel Only)

WARNING! ACCESS TO LIVE PARTS!

Ensure that the lid screws are loose and the handle is in the on position.

Locate the hole on the bottom of the handle, then push and hold a small pin into the hole to activate the defeat mechanism.

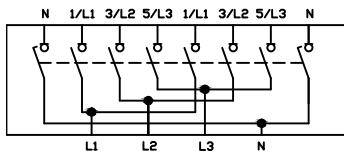

The lid can now be removed in the on position.

Keep the pin inserted to reinstall the door.
